

BUUK INFRASTRUCTURE (BUUK) ENVIRONMENTAL POLICY STATEMENT

BUUK Infrastructure are committed to the continuous improvement of our Environmental Management System and to reducing the impact on the Environment from our business activities.

This policy statement defines how we will ensure that our actions and results meet the legal and moral requirements of good Environmental management and where possible exceed the expectations of our Stakeholders and Society at large.

Our Environmental Objectives – We will:

- Continuously work towards our environment goal for our Business Operations to be Carbon Neutral or Carbon Net Zero in respect of Greenhouse Gas Emissions Scopes 1 and 2 and those elements Scope 3 under our direct control by 2040
- Ensure that we comply with relevant legal and regulatory requirements and appropriate codes of practice.
- Act proactively to prevent pollution incidents from our operations.
- Engage our people and other Stakeholders in the setting of our Environmental and Sustainability priorities and focus areas.
- Promote a culture of environmental responsibility and ownership throughout our business providing appropriate learning and development to employees involved in activities that interact with the environment creating a network of Sustainability Champions to advise and support our people.
- Have a Green Team in place so that the ideas of people throughout the Group are captured and opportunities for improvement maximised and to ensure that people can contribute to our Environmental and Sustainability strategy
- Positively contribute to the protection and conservation of the global environment by reducing the environmental burden caused by our business activities and by providing sustainable products and services to our customers
- Be innovative in addressing environmental challenges establishing cross process Focus Groups where improvement opportunities are identified
- Measure and monitor all Greenhouse gas emissions and maximise the use of renewable energy at our offices and depots and produce an annual ESG report.
- Continuously seek to identify and implement appropriate best practice and to improve our performance across the environmental spectrum
- Ensure that our people understand and adopt the environmental 3R's principles and Reduce, Reuse and Recycle effectively
- Work closely with our supply chain partners on environmental matters and to improve their product packaging, reduce waste, improve recycling rates and to help us to eradicate avoidable plastic packaging from our business
- Monitor the potential impacts of climate change using the best available projections to evaluate the need to adapt our business strategy
- Maintain our BS/EN/ISO 14001 registration and continuously work to improve our Environmental Management System
- To benchmark our sustainability performance globally and to improve our rating year on year
